The new DR2 2D brings a new level of compact size, functionality and durable construction to an enterprise digital assistant. Not only delivering a slim device with stylish look, but this device is also equipped with industrial-grade functions to meet the needs of a mobile workforce. The DR2 is an ideal, portable tool to streamline work processes in retail and field service.

The DR2 2D's user interface comes equipped with a 4.7" high-visibility color graphic display. The Gorilla Glass II with capacitive touch panel makes for a highly visible and durable display. The integrated 2D scan engine allows for scanning multiple symbologies in both 1D and 2D barcodes.

Offered with Android 4.3 operating system, the DR2 2D is powered by a 1.5 GHz microprocessor, making it particularly suitable for today's inventory solutions. Its internal components are protected by a ruggedized housing that is sealed against moisture and dust (IP65 particulate and water sealant rating), and capable of resisting multiple 4 foot drops to concrete. The unit's LED and vibrator indicators make for easy-to-recognize alerts during use. Additionally, the DR2 2D's integrated laser scanner is capable of reading all standard 1D or 2D barcodes including QR codes and GS1 Databar linear barcodes.

The DR2 2D includes a 1-year manufacturer's warranty covering material defects. Manufacturer warranties can be extended and upgraded to cover accidental breakage with the purchase of an optional WaspProtect extended service plan.
